# **1. Using this manual**

The following manual is designed to familiarize new users with the IDoD Web application and to provide extra knowledge for current users.

## 2. Getting started

### Overview

In order that the user is securely authenticated to IDoD, the user needs to have a valid email address and a password. The login credentials are provided by the system administrator. The user can contact the administrator by clicking on the *Contact Us* link available on the site footer.

Complete information need to be provided to the administrator such as name, email address and purpose of receiving access to IDoD.

On receiving confirmation from the system administrator, the user can access the web application by browsing to the URL supplied by the administrator and accessing the application using the credentials provided.
